

IMPROVE THE LIFE SCIENCE OMNICHANNEL EXPERIENCE

Know your customer no matter who (or where) they are

/WHAT WE DO

Meet ForgeRock. We're an identity and access management company. We secure digital identities for people, devices, and connected things online. We verify who you are and what you can access.

Our unified digital identity platform powers new cloud, mobile, and IoT services, so you can build secure, trusted relationships with customers and citizens anywhere, on any device.

/HOW WE DO IT

We tie digital identities together, so a person, their devices, their connected things, and all the services they use are consolidated into a single user profile. This makes it easy to personalize and protect customer services across channels. We use continuous, contextual identity data to spot unusual circumstances anytime and anywhere. And we satisfy users with the power to set their own privacy preferences.

We offer the only digital identity platform uniquely designed as a unified solution, with a single REST API for invoking any identity service. Flexible enough to handle any digital application on premises or in the cloud, our platform scales to handle hundreds of millions of identities and deploys fast - at the pace of today's business.

ACCELERATE USER ENGAGEMENT

Reduce registration and transaction friction with single sign-on and social sign-on capabilities. Provide a single self-service platform for users to manage their accounts. Enable innovative mobile experiences that drive user engagement.

DRIVE USER EXPERIENCES

Streamline how Health Care Practitioners and patients access and exchange drug and treatment information thus improving health outcomes.

CREATE AN OMNICHANNEL EXPERIENCE

Consolidate the identity data of users, their devices, and connected things to create a unified user profile across all digital channels. Connect previously siloed lines of business so every interaction across all channels, both physical and digital, is consistent and personalized.

LEVERAGE A UNIFIED IDENTITY PLATFORM

Federate your existing digital channels into one unified platform that is production-ready, highly flexible, and extensible. Allowing the Health Care Practitioners and patients to continue engagement through their existing methods while unifying the experience across all channels.

“ForgeRock has a well thought-out platform and integration strategy with a comprehensive set of REST APIs.”

KuppingerCole Leadership Compass “IAM/IAG Suites”

/THE FORGEROCK IDENTITY PLATFORM™

THE FOUNDATION FOR DIGITAL TRANSFORMATION

DRIVE USER EXPERIENCES

- Remove barriers to user engagement
- Build relationships based on relevance
- Unify user experience across all channels

GAIN VALUE FROM USER DATA

- Supply the data your departments need to compete in today's digital marketplace
- Simplify infrastructure integration including to legacy components
- Centralize identity management across all business units and partners

MOBILIZE FOR THE NEW CONNECTED WORLD

- Enable user-controlled data sharing across cloud, mobile, and IOT sources on any device
- Support real-time, contextual, and continuous security
- Provide a seamless, secure, and consistent experience on any device

BUILD TRUSTED RELATIONSHIPS WITH PRIVACY & CONSENT

- Enable users to selectively and securely share personal data
- Protect user data and comply with global and regional privacy regulations without impacting user experience

PREPARE FOR SCALE

- Assign digital identities to a platform that is built to handle hundreds of millions of identities
- Manage global users across brands, franchises, channels and devices

SPEED TIME TO ROI

- Integrate with existing infrastructure
- Adapt and scale to the technical requirements that your business needs today with little investment
- Remove the need to change current business practices with a flexible platform
- Leverage user self-service to reduce support costs
